light should consider the balance between intensity(brightness) and color temperature, users easily know the merit of the mobile light as it allows to control both indices. Surgeon may set adequate eye comfort circumstance by customizing intensity and color temperature.

- Pattern size for the light can be adjusted to different operations. According to the size of the affected area, pattern size can be controlled from 15cm to 25cm.

- For intensive illumination in specific area, 15cm focus can be selected.
- For wider focus and more scialytic effect, 25cm focus can be selected.
- Hybrid LED Optical Design combined lens and reflector ensures high light intensity and efficiency compared to normal reflector.
- Making cool light is crucial for preventing dry-up of the affected area during the surgery. Hybrid mechanism of the light helps have energy saving performance which is directly linked to lower temperature light.
- Adjustable Focus By rotating central knob, users can easily select the focal size from 15cm to
